

Service overview

Executable roadmap

Accelerated business benefit from the start

Every journey has to start somewhere. Whether you are planning a long journey, or a short journey, the question is always - where do we start?

Knowing where to start, where to go next and what the journey looks like, will not only provide cost and resource plans, but also certainty and alignment to your business strategy.

Our accelerated roadmap offering means that you will know exactly where to start your journey, when to reasonably expect tangible outcomes, what skills are required and how much investment is needed.

What?

What do I need to do to uplift my business over the next 3-5 years

When?

When can I expect deliverables or improvement?

Who?

Who will do the work and what skills do I need?

Why?

Why do we need to do this and what are the benefits?

How?

How do I manage the change and how much will it cost?

Where?

Where do I start in my business?

Cost effective and practical

We provide our roadmap as a fixed cost service over a short period of time (as quick as 3 weeks) leaving you with confidence on what you are going to get, when you are going to get it and how much it will cost you.

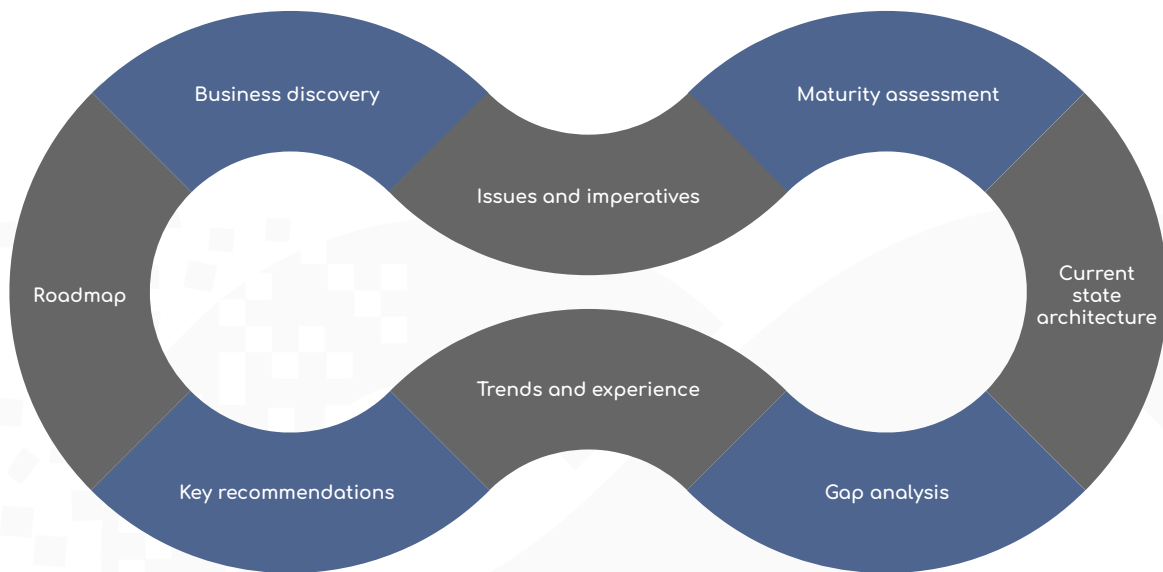

A typical engagement consists of a success meeting, where we define the engagement, 3-5 one-on-one interviews engaging the most senior stakeholders, 5-10 discovery sessions with SMEs and a focussed workshop.

We structure the interviews based on the expectations from the success meeting and once we have completed all our interviews, we apply our knowledge and experience to deliver a tailored outcome to ensure you are setting yourself up for a successful journey.

A typical roadmap engagement costs between \$40k and \$70k.

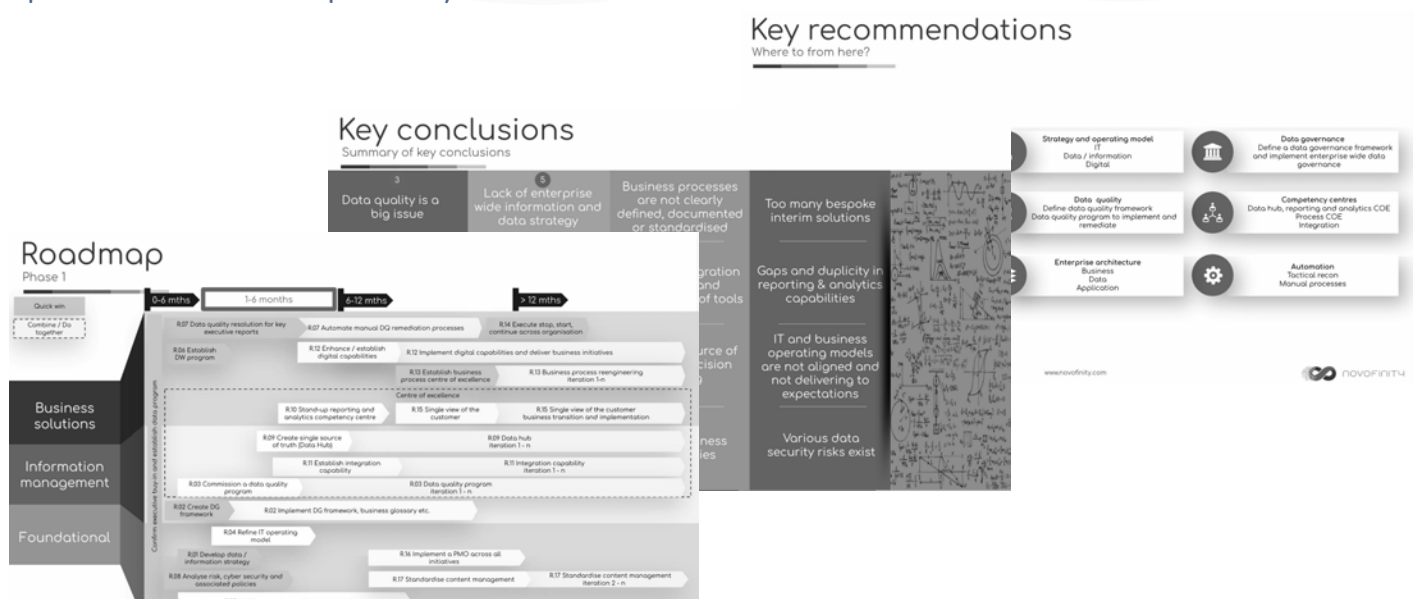

Our approach

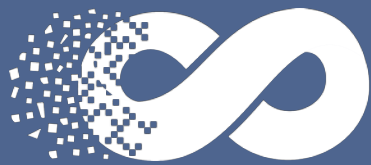

We have perfected our approach over the years and have practically proven its effectiveness. As with all things, we believe in starting at the top to ensure we take into account business strategy, imperatives and priorities. Our approach is tailored to be delivered at a fixed cost based on your requirements.

What we deliver

Our main deliverable is an executable roadmap taking into account your specific needs and situation. We also ensure we capture all pain points, issues and wishlists and present these in priority order.
